

digiEdit

Content Editing

digiEdit allows you to manage the content of your Sanders Design website, without having to learn complex programming skills. It's easy to use, simplistic to control, and delivers instant results - keeping your customers informed with fresh content, and an up to date corporate image.

Using digiEdit as your website publishing solution includes the following benefits:

- **Simplicity**
No software to install, or large servers to maintain - your website is published by us; we apply the technology, you manage the content as much or as little as you require.
- **Design**
You'll have a website designed by Sanders Design; an innovative and established design studio. Once it's been published and gone 'live.' digiEdit then takes care of the technical, allowing you to update with minimal fuss.
- **Accessibility**
It's easy to update your website; whenever and wherever - so long as you have access to an Internet enabled PC.
- **Agility**
digiEdit is an internet based system for people who want to run their professionally designed websites without the need to learn programming skills.
- **Informative**
When you want your website to tell visitors something new about your organisation, you can update it instantly. Keeping your site up to date with fresh content is easy with digiEdit.

Content editing interface in browse mode

For corporate internet branding, and web site search engine positioning, digiEdit is the only content management solution you'll need

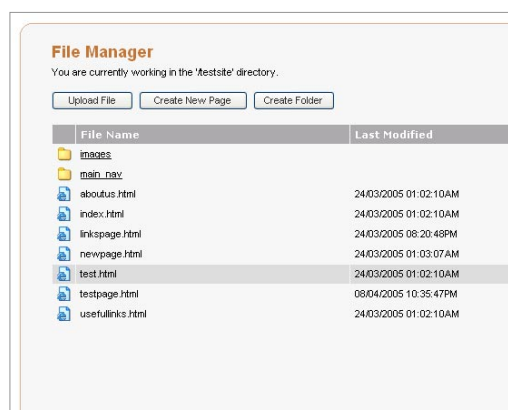

- **100% web-native solution**
digiEdit is managed totally from your web browser - with no end user downloads, and easy and transparent updates.
- **Staff need no training**
Even novice Internet users can use digiEdit. digiEdit's design elements are similar to the Microsoft Windows operating system, with clickable icons and dropdown menus.
- **24/7 instant availability**
digiEdit runs directly from a web browser; users can login and build /edit their web site at a time that suits your business.
- **Multiple authoring modes**
digiEdit has 2 authoring modes: simple - browse site, click edit; and advanced mode - a Windows Explorer style file manager.
- **Integrated standards support**
digiEdit is up-to-date with past and present standards - including XHTML-compliant output - as the Internet develops.
- **Task-based user grouping**
Multi-user support enables team collaboration; groups of users can manage different areas of a website.
- **Rollback content authoring**
digiEdit stores a back up copy of each edited page - one click to roll back.
- **No HTML experience required**
Become a web designer without the need to learn HTML or programming languages. All commands are point and click; building, editing and updating is quick and simple.
- **More than simple HTML editing**
DigiEdit includes integrated spell checking utilities, find /replace and direct source-code editing for advanced users. And wizards for complex tasks, including form and table creation.
