

# digiStores

E-commerce Stores

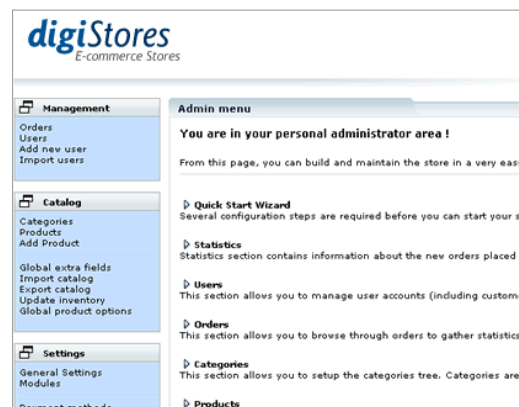

Welcome to digiStores, brought to you by Sanders Design. E-commerce is now the fastest rising generator of growth and demand in the market place. digistores provides a global, instant and brand reflective retail facility for your website. E-commerce trading with digistores is quick to set up, and easy to maintain. digistores allows your customers to purchase your goods and services securely and with ease, in a website that reflects your brand and promotes your business.

Advantages include:

- **Fast start-up**  
Commission Sanders Design for your secure e-commerce solution and start trading online within weeks. Our e-commerce website designers will incorporate all the features that you would expect: secure hosting, professional design, intuitive navigation, all wrapped up in one comprehensive turnkey e-commerce shopping cart solution fully in tune with your brand values.
- **Global access**  
Where there is an Internet connection, there is a customer for your product and service.
- **Level playing field**  
Our specialist e-commerce website designers offer affordable solutions to smaller businesses as much as larger corporations, that look and feel big.
- **24 hour trade**  
Our websites deliver round the clock retail, unrestricted by manual opening hours associated with staff availability, competing with traders in other time-zones.

Membership Management

Control Panel Index

- **Customer satisfaction**

Customers can buy and browse easily through digiStores websites; orders can be tracked from start to end - an easy to use e-commerce solution.

- **Brand visibility**

Our web designers incorporate the features of your organisation, so your brand comes alive through a digiStores e-commerce solution.

- **Reduced marketing costs**

Your business shows up more frequently and higher on Internet searches such as Froogle, the popular Google shopping tool. digiStores provides search engine optimisation as a standard e-commerce enterprise solution. Reach more of your target audience, and keep new and existing customers informed.

- **Intuitive navigation**

Sanders Design websites are easy to navigate, and each page is geared to be as usable as possible; they'll make sense to your customers; they'll generate sales.

- **Personalised customer service**

DigiStores websites include individual customer accounts, as you would expect from a professionally designed e-commerce shopping cart solution. This provides useful information about buying habits, and can be used in your organisation's marketing strategies.

- **Product/service expansion**

You can expand, even if you run out of space in your premises, by using digiStores Internet retail techniques.

- **Enhanced customer awareness**

Use your digiStores website to provide customer information about your established outlet. If you already have such a site, converting it to digiStores for sales purposes requires minimal investment.

- **Streamlined business processes**

digiStores allows seamless processing of orders, card details, delivery and tracking as a transparent and secure e-commerce solution. And with up to date e-commerce shopping cart solutions you can lead in your marketplace.

Search Orders

- **Scalable Solutions**

digiStores technology works with companies that expand, changes and developments are not just accommodated, they are propagated.

- **True Internet Based**

You can maintain your e-commerce website from any Internet connection, anywhere in the world. That includes processing orders, checking product details, and supporting your customers.

- **Full Retail Support**

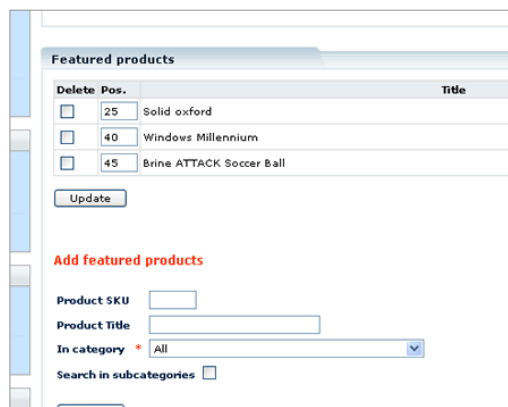

Our e-commerce website designers adapt digiStores technology to handle physical and virtual goods. Whether you sell digital goods (e.g. software) or supply physical items (e.g. furnishings) - or you intend to do both - you are always fully in control of your online business.

- **Flexible Payment**

Accept payment in any currency, from any country, including instant and offline Credit Card payments, purchase orders, and telephone purchase.

- **Comprehensive Systems Integration**

All the data from sales, clients, and marketing can be published in popular formats such as Excel and Word - making it easier for you to prepare presentations and reports on your companies online activities.
